

Rules for dog owners

- The municipality of Arosa has set up green "Robidog containers" in numerous places for the collection of dog excrement. With plastic bags, which are also available, excrement must be taken up hygienically. With that, you can help to keep pavements, streets and walking paths clean.
- All dogs hunt from their original instinct when they are given the opportunity. Even the best four-legged friend should not walk around freely in the forest in order not to endanger our game animals. Please keep your dog on a leash! The other animals thank you.
- Dogs must also be kept on a leash on marked ski slopes, ski practice areas and cross-country ski runs, in public parks, public restaurants and in animal sanctuaries.
- Dogs are only transported on the "closed installations" (aerial tramway, gondola). These are the cable car Arosa-Weisshorn 1st and 2nd section, the underground railway and the cable cars Hörnli and Kulm (the cable car Kulm is only in operation in winter). No dog transports (animal transports) are permitted on the chair lifts. This is due to safety regulations, in particular with regard to the rescue of persons with animals on these facilities. Dogs are transported free of charge with the above mentioned railway facilities.
- It is forbidden to use the dog in schools, churches, cemeteries, hospitals, shops for food and to take away public places. Except guide dogs.
